

Reminder – Expanded Relationship with EyeMed to Manage Routine Vision Benefits

Today, we work with EyeMed to manage HAP's routine vision service benefits (i.e., routine eye exams and hardware) for HAP Medicare Individual members and HAP Empowered Duals (HMO SNP) members. Our relationship is expanding.

Effective January 1, 2022, EyeMed will provide HAP's routine vision service benefits for members in the following plans:

- HAP Commercial
- All ASO Group
- HAP Group Medicare
- HAP Alliance Medicare Supplemental

HAP will maintain administration and management of medical and surgical vision services.

Network participation

To provide routine vision services for our eligible members, you must participate with the EyeMed Insight provider network. Note:

- If you're already in the EyeMed Insight network, there is nothing you need to do.
- If you are not in the EyeMed Insight network, visit eyemedinfocus.com/join/

Provider directory and updating demographic information

- To search for a routine vision provider in the EyeMed Insight Network, visit hap.org/eyedoctor. To update demographic information, contact EyeMed.
- To search for a medical or surgical vision provider, visit hap.org/find-a-doctor. To update demographic information, email providernetwork@hap.org and include your Type 1 and 2 NPI and Tax ID.

Prior authorizations and referrals

Prior authorizations or referrals are not required to use the routine vision services benefit.

Discounts

There are hardware discounts for members without hardware coverage. For more information on these discounts as well as manuals, instructions and a link to the EyeMed claims system, visit <https://eyemed.com/en-us/provider/resources>.

Vision Services Lists

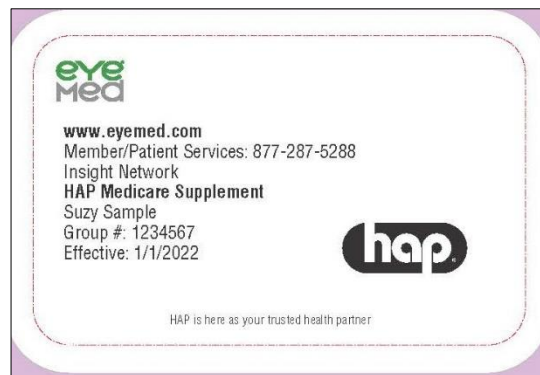

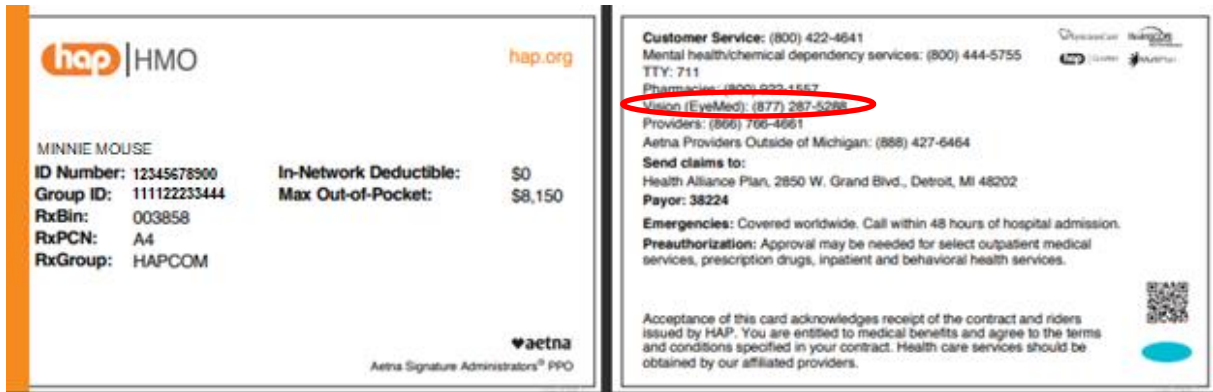

We're removing the following lists from the secure provider portal:

- Billable ophthalmology services
- Billable optometry services list

Nothing has changed by removing these lists. Ophthalmologists and optometrists should refer to the billable codes in their HAP contract for reimbursement.

ID card

Members with vision coverage have Vision (EyeMed) on the back of their ID card. Some members may have a separate vision ID card. See examples below.

Member Benefits

Members have different benefit levels and copay requirements based on their HAP plan. Participating EyeMed Providers can verify eligibility and submit claims for HAP members who have routine vision benefits by using EyeMed's system at:

<https://claims.eyemedvisioncare.com/claims/loginForm.emvc>

Once logged in to the site, you can get additional training on using the site. Here are the steps:

1. Click on *Provider Website* in the left-hand navigation
2. Go to inFocus to access EyeMed's many How To Guides

If you have questions about member eligibility or need other support, contact EyeMed [online](#) or at (888) 581-3648.

Routine Codes

A list of routine codes can be found below. The most up-to-date list can be found online. Log in at hap.org and select *Quick Links; Procedure Reference Lists; Services that Require Prior Authorization List*.

CPT codes

92002*	92012*	92071-92072	92325-92326
