

Meridian: Addition of Telehealth Codes

Meridian has recently added a number of telehealth codes related to the Gateway to Surplus measures within the Meridian Value Based Agreement. These codes can be utilized to improve compliance percentages and will not negatively impact performance:

The following CPT/HCPCS codes are now included in the Gateway logic as meeting and determining compliance for both PCP and specialist visits in all seven (7) measures:

- 99421
- 99422
- 99423
- 99441
- 99442
- 99443
- G0071

Additionally, this change was retro-actively applied back to dates of service January 1, 2020 for this measurement year. All other provisions of your Agreement will remain in full force and effect.
