

OPNS Informatics Digest

November 2016

What path will you take?

OPNS Informatics

Information Technology represents a piece of the health care puzzle. It's more than computers and tablets.

It involves strategic planning, incorporates all aspects of each program and initiative to more efficiently guide patients through the Patient Centered Medical Home Neighborhood.

2016 Increase in Technology Adoption

Over the last six months the OPNS network has increased technology adoption and utilization in three areas that play a role in coordinating patient care by offering simple and organized communication.

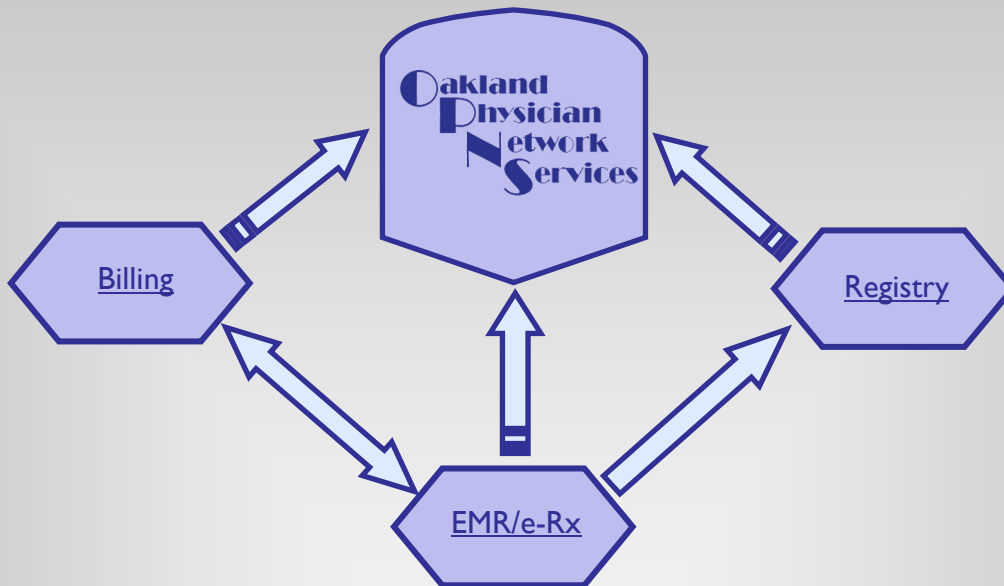

- **Electronic Learning Tool** - 5.1%
- **Electronic Referral (HIE)** - 10.7%
- **Electronic Registry** - 3.2%

Although there are many options available, OPNS encourages and supports physicians to embrace technology. OPNS and the Informatics Department are available for assistance if there are any questions regarding the Electronic Learning tool, Electronic Referral (HIE), or an Electronic Registry.

It's called a paradigm shift for a reason

Consistency limits variation, which in turn decreases the opportunity for disorganized and unnecessary communication barriers. Utilizing technology as a form of secure information sharing can help physicians communicate and exchange critical elements for decision making.

OPNS Preferred Suite of Products

EMR Supplemental Data

AthenaHealth EMR interfaces with the OPNS data warehouse and Health Focus Registry.

EMR Supplemental Data Exchange routes data entered into the EMR through OPNS to the Health Plans.

OPNS has established EMR Supplemental Data Exchange programs with the following health plans.

- BCBSM
- BCN
- HAP
- Priority Health

This increases data capture, quality scores, and revenue for participating practice units and physicians.

Please note that only approved measures are exchanged with each individual health plan. Contact OPNS for more information.

It's called a paradigm shift for a reason

The Health Focus Registry is the source for Unmet Measures and the Clinical Quality Scorecards. Learn how to use Health Focus to help your practice monitor the OPNS population of patients.

AthenaHealth Ranks Highest

According to KLAS, AthenaHealth ranks highest in:

- Vendor Effectiveness
- Customer Ratings
- Integration

"Interoperability 2015: Are we lifting together?," page 4, September 2015. © 2015 KLAS Enterprises, LLC. All rights reserved.

Additional EMR Integration Options

- Greenway Health
- NextGen
- Practice Fusion
- PrognoCis
- MieWeb Webchart
